如何新增圖片

How to add Image to FLASK
app

在 flaskTest01 專案下建立資料夾 static

在 static 下，放入一個圖片檔 KSU.svg

編輯 index.html

<> index.html ●

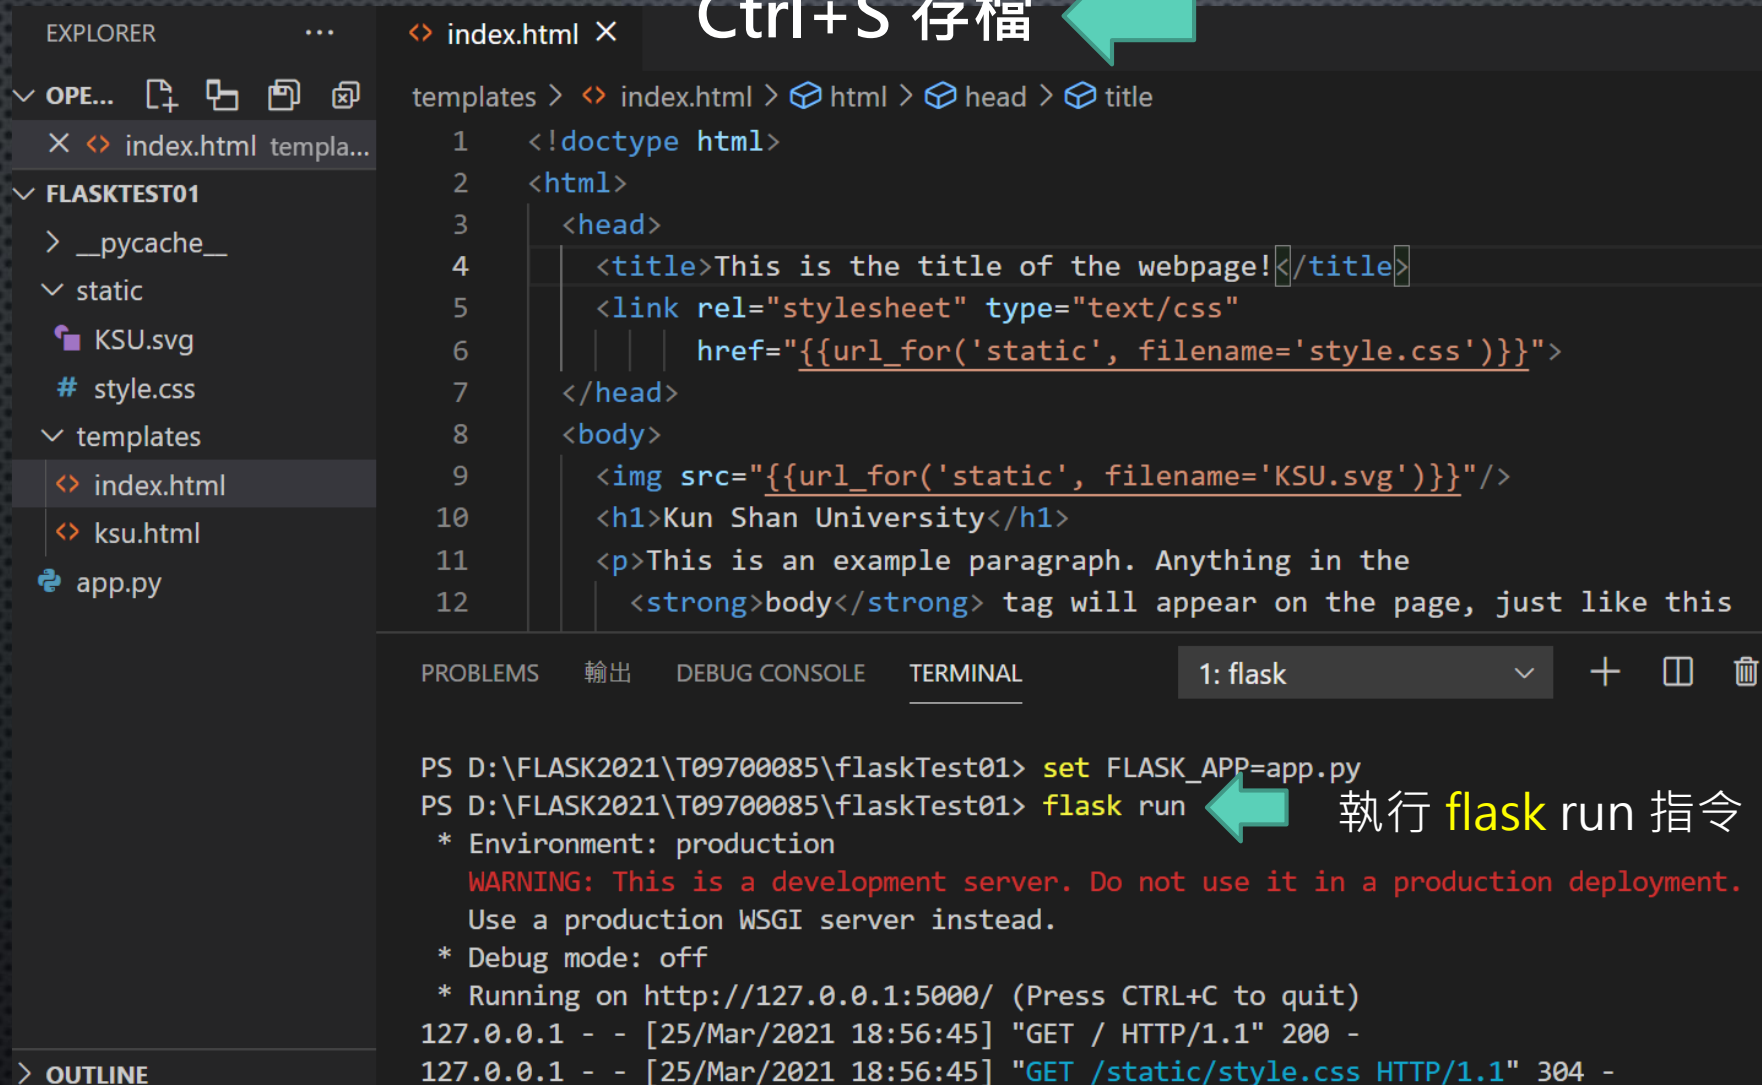

templates > <> index.html > html > body > img

```
1  <!doctype html>
2  <html>
3    <head>
4      <title>This is the title of the webpage!</title>
5      <link rel="stylesheet" type="text/css"
6        href="{{url_for('static', filename='style.css')}}">
7    </head>
8    <body>
9      
10     <h1>Kun Shan University</h1>
11     <p>This is an example paragraph. Anything in the
12       <strong>body</strong> tag will appear on the page, just like this
13       <strong>p</strong> tag and its contents.</p>
14   </body>
15 </html>
```

Insert 新增

編輯 index.html

Ctrl+S 存檔 

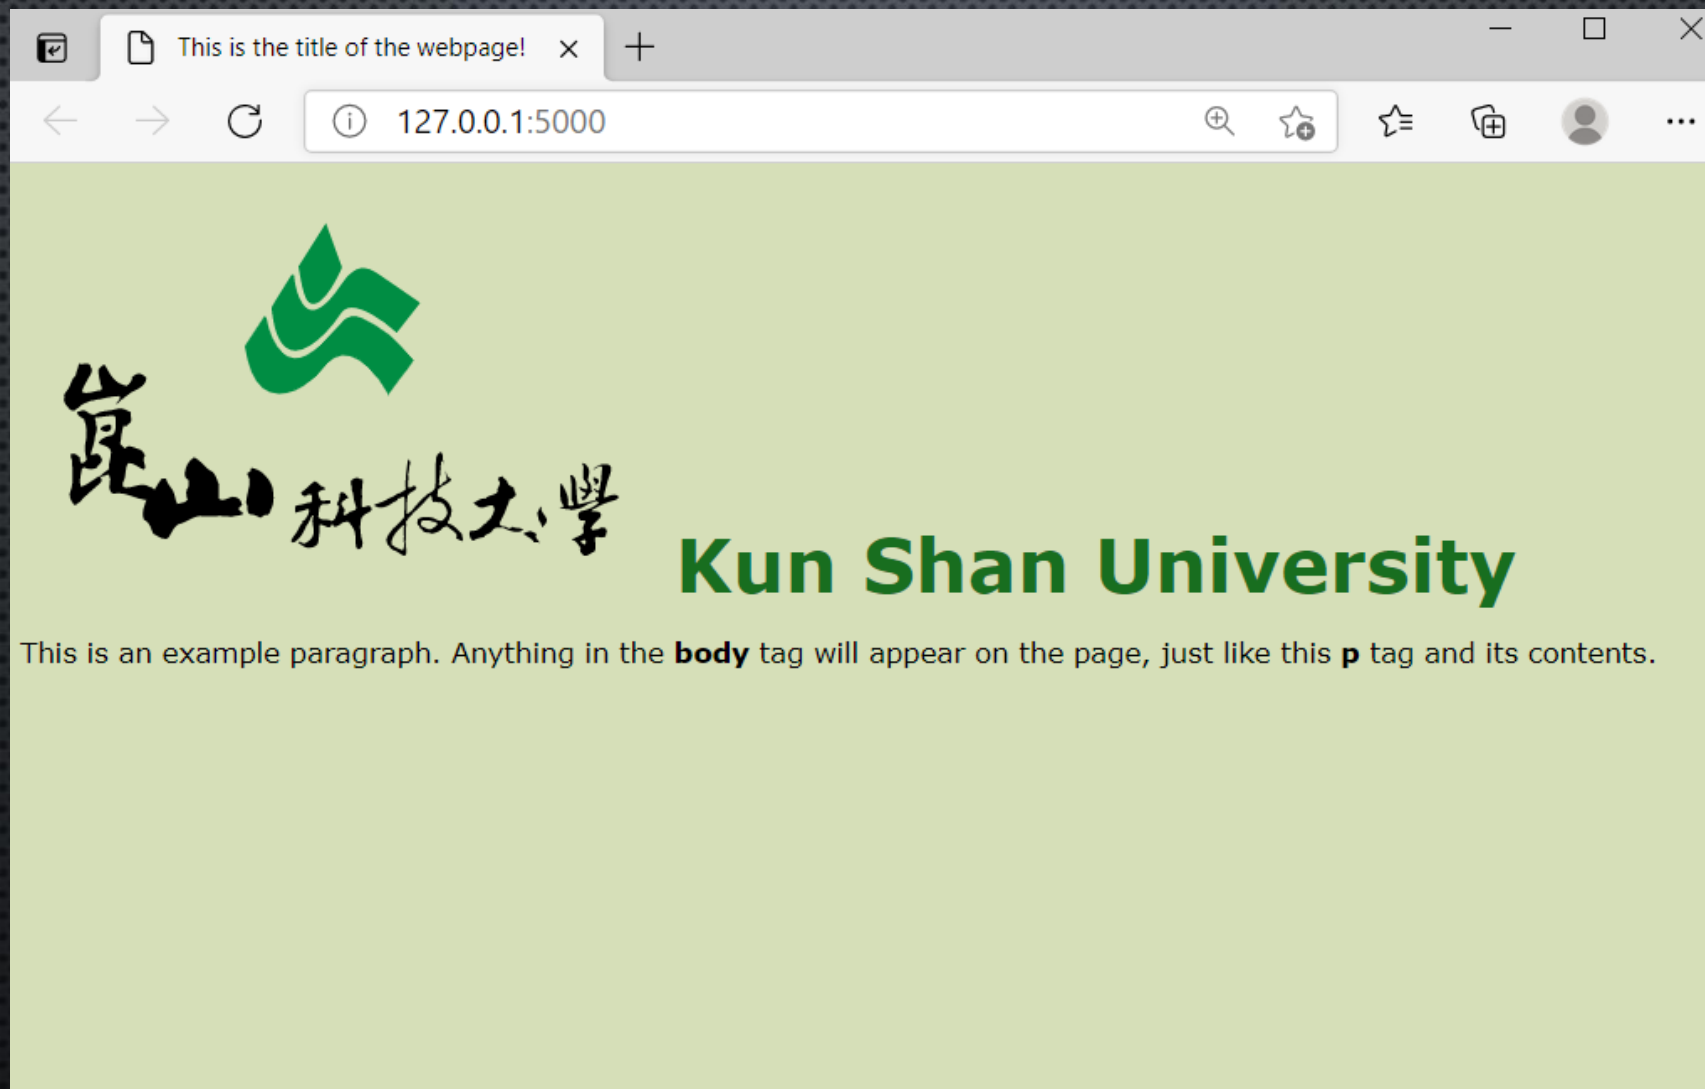

The image shows a VS Code editor window with the file `index.html` open. The Explorer sidebar on the left shows the project structure: `FLASKTEST01` containing `__pycache__`, `static` (with `KSU.svg` and `style.css`), and `templates` (with `index.html` and `ksu.html`). The main editor area shows the content of `index.html`, which is an HTML template for Kun Shan University. The code includes a doctype, html, head, and body tags. The head contains a title and a link to a stylesheet. The body contains an image and a paragraph. The terminal at the bottom shows the command `flask run` being executed, with output indicating the server is running on `http://127.0.0.1:5000/`.

```
1 <!doctype html>
2 <html>
3   <head>
4     <title>This is the title of the webpage!</title>
5     <link rel="stylesheet" type="text/css"
6         href="{{url_for('static', filename='style.css')}}">
7   </head>
8   <body>
9     
10    <h1>Kun Shan University</h1>
11    <p>This is an example paragraph. Anything in the
12      <strong>body</strong> tag will appear on the page, just like this
```

PROBLEMS 輸出 DEBUG CONSOLE TERMINAL 1: flask

```
PS D:\FLASK2021\T09700085\flaskTest01> set FLASK_APP=app.py
PS D:\FLASK2021\T09700085\flaskTest01> flask run
* Environment: production
  WARNING: This is a development server. Do not use it in a production deployment.
  Use a production WSGI server instead.
* Debug mode: off
* Running on http://127.0.0.1:5000/ (Press CTRL+C to quit)
127.0.0.1 - - [25/Mar/2021 18:56:45] "GET / HTTP/1.1" 200 -
127.0.0.1 - - [25/Mar/2021 18:56:45] "GET /static/style.css HTTP/1.1" 304 -
